Education

Bachelor of Science in Computer Science

Minor in Mathematics

May 2026

GPA: 3.25

University of Arkansas, Fayetteville AR

Professional Work Experience

Enterprise Technology Treasury Management Intern

June 2025 – August 2025

First Horizon Bank | Memphis, TN

- **Developed a full-stack web application** with two main pages: a company data display and a customer contact submission form using **Java**, **Spring Boot**, and **React**
- **Integrated Microsoft SQL Server** with Spring Boot to retrieve and display company data, including the filtering of attributes
- **Engineered a responsive front-end** with React to present structured company information as well as collect customer and banking details cleanly and intuitively

Technical Skills

Languages: Java, C++, Python, SQL

Web and Frameworks: React, HTML, CSS, Spring boot, Node.js, Tomcat, WebSphere

Databases, Tools & AI Assistants: SQL Server Management Studio, VS Code, Bitbucket, Git, GitHub, GitHub Copilot, Claude, ChatGPT, Gemini, Devin

Projects:

High Density Electronic Center Online Scheduler (*Capstone Project*)

Jan-May 2026

- Helped lead a team of 6 developers in the design of an internal scheduling web application for managing equipment-based appointments and certification workflows
- Built features that allowed users to schedule appointments based on active equipment certifications, improving scheduling accuracy and operational effectiveness
- Developed administrative tools for managing users, equipment, certifications, and appointments within a centralized full-stack platform.

Company Filtering Website (*Internship Project*)

Jun-Aug 2025

- Created a full-stack internal web application using Spring Boot and React to transform raw company database records into a user-friendly interface for non-technical workers
- Designed and implemented RESTful APIs and frontend components to retrieve, process, and display company data across the application
- Improved internal data accessibility and usability by replacing direct database lookups with intuitive UI, helping coworkers read and navigate company information more efficiently.

Contacts App – Full-stack Contact Manager (*Personal Project*)

June 2025

- Built a web application using CRUD operations to manage user contacts locally, using a Spring-boot backend and a React frontend
- Designed and implemented RESTful API endpoints to handle the contact creation, retrieval, as well as the display
- Configured frontend state management and dynamic rendering of user-created contact data

Registered Student Organizations

CyberHogs Cybersecurity Club – Member

Spring 2024 – 2026

- Attended club meetings and lectures focused on cybersecurity awareness and best practices
- Engaged in discussions with peers on current events in cybersecurity and ethical hacking
